

Einbecker

Historic Brauherren Pilsner, Unfiltered

It is a most unusual, one-of-a-kind edition of Einbecker Brauherren Pilsner . Completely unfiltered. Directly transferred from the tank at Einbecker Brauhaus into our temperature controlled tank container ..and then into our own 30l + 50l kegs at Oxford CT, USA. **Keg fitting:** American Sankey, slim/ tall.

As you know all German lager brews were unfiltered before “the beer filter” was invented in the 1870s. When the German engineer Carl Linde added the idea of a “cooling machine” {1870s} the door was opened for the “Pilsner” style.

The Einbecker “historic unfiltered Brauherren Pilsner” allows us to enjoy Einbecker Brauherren Pilsner at its highest level of flavors and aromas. **A most unusual historic experience!**

ETA Via temperature controlled tank container : 7/25/2019
